

Supporting Military Families & Veterans in Flexible Careers

Going Beyond Training & Placement

Developed by Connected Nation to meet the growing demand for online workers, this one-of-kind job-creation program goes beyond training and placement to long-term career guidance and mentorship.

All of the jobs are remote and are in fields that are in demand — providing employment opportunities that are both flexible and can move with you when needed.

Digital Works has established relationships with more than 70 employers across the country and customizes its training so YOU are learning the skills companies are searching for in employees.

Our training and mentoring is designed for quick job placement, typically within a 4-8 week cycle with a conservative placement rate of 80%!

This makes Digital Works a jobs program perfectly fit for the unique needs of veterans and military spouses.

Sign Up Today

August 13th

Our 4-week course geared toward military spouses

September 17th
